

L^AT_EX

L^AT_EX is a document preparation system for the T_EX typesetting program[TCV⁺]. It offers programmable desktop publishing features and extensive facilities for automating most aspects of typesetting and desktop publishing, including numbering and cross-referencing, tables and figures, page layout, bibliographies, and much more. L^AT_EX was originally written in 1984 by Leslie Lamport and has become the dominant method for using T_EX; few people write in plain T_EX anymore. The current version is L^AT_EX 2_ε. (See table 2)

1 equations

$$E = mc^2 \tag{1}$$

$$m = \frac{m_0}{\sqrt{1 - \frac{v^2}{c^2}}} \tag{2}$$

2 simple table

Table 1: This is a table caption

X	Y	Z
A	B	C
D	E	F
